

ECO-pots for cultivation for the home gardener!

Product description of ECODEGRADE Eco-pot (Standard):

-  attractive set of 10 Eco-pots standards Ø 12cm incl. cultivation notes for your customers
-  from native cellulose (origin thinnings and saw-wood residues)
-  contains no coconut, peat, plastic or PLA
-  Eco-pots can be planted in to the soil and depending on soil conditions and climate, this pot decomposes within a short time by itself - save yourself the removing of the pots before planting (repotting)
-  biodegradable - decompose in the soil within a few weeks without remains (depending on soil conditions and climate)
-  no plastic packaging - our set (as a whole) is compostable

Well thought through - conserves valuable resources.
